STATE'S CLAIM.

The following communication has been received by the Executive from John L. Kerr, Esq. agent of this state for the recovery of her claim spon the general government for monies advanced during the late Wat:

Easton, December 2d, 1820.

Sir-I have the pleasure to inform von, that I have this evening reteived by the mail, a letter from Mr. Higner, dated the 29th of November, in which he states, that the accounts of the State of Maryland had ben at last audited, and that actording to the statement made in his office, the balance due to the state amounts to ninety-four thousand seven hundred and ten dollars and twenty one cents, subject to the fual decision of the 2d Comptroller. As the report of Mr. Hagner has doubtless had the previous approbation of the Secretary of War. there can be very little doubt of this sum king soon paid to the state. Mr. Hagner assures me, when the actounts are returned to his office by the comptroller, I shall be furnished with a particular statement of the differences between the amount daimed by the state, and that allowed by the United States.

I feel much satisfaction in the prospect of a speedy close of this ing protracted liquidation of the state's claim.

I remain sir, with high respect, your obedient and humble servant, JOHN LEEDS KERR.

But From the Detroit Gazette of Nov. 10. in calling a Convention, the security of our whole social system ought not to be put in jeopardy. The vital importance of an able and independent judiciary, should be remembered. We should not lose sight of the tenor of various offices, in the gift of the executive, and in the gift of the people. We should not forget the safety which is found, in the judicious and wholesome exercise of the elective franchise. Balances and checks are the preservation of a free constitution. Destroy these, and you open the flood-gates of anarchy, and prepare the public mind, for a grinding and desponding servitude.

In this country, the grand contest for the elementary principles of liberty, is over. The throne of the despot, and the altar of martyr dem, are unknown to our condition. -The political institutions of the United States, are the admiration of mankind, and the hope of the human race. Their preservation now constitutes the great duty which devolves upon us. And what are the dictates of wisdom? What are the deep-toned counsels of experience? That we shall proceed to alterations, with caution, with candor, and with lively apprehensions. That party feelings shall never be suffered to invade the empire of reason, and banish the recollection, that we not only act for ourselves, but that we also act, for posterity.

In voting for the rejection of the bill to call a convention, you have kept in view the immense interests which are at stake. You have recollected, that not only our constitution, but the venerable ordinances of our fathers, the rights, the security and the peace of the state, are involved in the crisis at which we have arrived. Let the election of delegates and the meeting of a convention, once take place, under furious party excitement; let the alterations of our constitution be made, to subserve the ends of any faction, whatever may be its name and pretensions, and what have we to expect but the production of an instrument bearing the features of a political monster? What have we to anticipate but unceasing anarchy and confusion? What have we to apprehend but the loss of our state to bring in a further supplement to glory, the extinguishment of our the act for regulating the mode of pride, and the degradation of our has experienced a larger portion of our affairs shall arrive, we may look for the prostration of virtue, and the persecution of integrity and independence. A long and vindictive watere will ensue, new and implacable parties be called up, and the very bonds of society must be violated and endangered. And when our history is transmitted to after ages, he who writes it may adopt the language Humes. A Curiosity .- A person by the name of Robinson, has obtained and brought from the Indian country near Mackinac, an Indian, having in each arm and leg more than double the number of joints ordinarily allowed to man by Dame Nature .-This extraordinary being is in a measure helpless, & unable to stand, yet he has discovered a contrivance by which he obtains locomotionthis is a large wooden bowl, in which he rolls himself along with considerable facility when on a smooth and level surface. This Indian, we are informed, is quite intelligent, speaking the tongues of three or four different tribes, and conversing fluently in the common

French of the country. Mr. Robinson mentions that he saw, while in the Indian country, what he deems a far greater curiosity. This is an Indian, whose body is thickly covered with long hair. The hair on the outside of his hands and fingers, which is permitted to grow, is stated to be so long that he is enabled to tie it round his wrists. His forehead, nose, and every part of his face is said to be covered with hair. The Indians of his tribe are stated to pay him much respect in consequence of his superior sagacity and hardiness.

Philadelphia, Nov. 24. Mr. Guille's ascent .- At a few minutes before three o'clock yesterday afternoon, Mr. Guille ascended with his balloon and a small parachute, amidst the acclamations and cheerings of an immense concourse of spectators. The weather being entirely calm, and the heavens somewhat overshadowed, the ascent was gradual, affording the citizens a fine opportunity to observe the operation and effect of disengaging the parachute; which he did at a considerable height, leaving his companion (the Monkey) to the mercy of the air. The Monkey reached the earth, howver in perfect safety, not many rods from where he ascended. The balloon, with Mr. Guille, after hovering over the city for several minutes. took a north westerly direction, and descended at Maniua Village, near Mr. Britton's residence.

Upon the whole, the spectacle was quite gratifying, and character? When such a period in has experienced a larger portion of public patronage on this occasion than he did on his former excursion. We understand, that Mr. Lukens,

an ingenious and philosophical mechanic of this city, was extremely solicitous to accompany Mr. Guille in this ærial voyage.
